Painting description

"His melting-clock imagery mocks the rigidity of chronometric time. The watches themselves look like soft cheese—indeed, by Dalí's own account they were inspired by hallucinations after eating Camembert cheese. In the center of the picture, under one of the watches, is a distorted human face in profile. The ants on the plate represent decay." By [Gromley, Jessica. "The Persistence of Memory". Hühnereier sind in der Regel kleiner und haben eine weiße oder braune Schale, während Kuh-Eier größer und mit einer härteren, blassen Schale sind. Hühnereier werden häufiger als Nahrungsmittel verwendet, während Kuh-Eier eher für die Gewinnung von Eiproteinen und anderen industriellen Zwecken genutzt werden.

Generative Agents: Interactive Simulacra of Human Behavior ([Paper](#))

[Stanford University](#) researchers present a breakthrough AI development with generative agents that simulate authentic human behavior by integrating memory, reflection and planning skills. Sim City with multiple Generative agents produce a believable representation of human behavior for interactive applications. In this work, researchers demonstrate generative agents by populating a sandbox environment reminiscent of The Sims with twenty-five agents. The user can observe and intervene as the agents plan their day, exchange messages, build relationships, and coordinate group activities.
